UID Exp: 07

AIM:

The aim is to design and compare different layouts and color themes for a Video Editing Mobile Application Interface and evaluate user feedback based on usability, visual appeal, and functionality using GIMP.

PROCEDURE:

Step 1: Install GIMP

- Download and install GIMP from the official website.

Step 2: Create a New Project

- Open GIMP
- Canvas Size: 1080 × 1920 pixels (standard mobile UI design)

Step 3: Base Layout Design

1. Divide Sections:

- Use Rectangle Select Tool to create:
  - Header (Menu + Export button)
  - Video Preview Area (empty placeholder box)
  - Timeline Section
  - Control Buttons Area
  - Bottom Tool Panel
- Fill using Bucket Fill Tool with base colors.

2. Add UI Elements:

- Text Tool:
  - App name (EditPro)
  - Button text (Export, Cut, Trim, Filter, Music)
- Shape Tools:
  - Rectangles → buttons, preview box
  - Circles → play/pause buttons
  - Lines → timeline

3. Layer Organization:

- Create separate layers:
  - Header
  - Preview Box
  - Timeline
  - Controls
  - Tool Buttons

Step 4: Create Colour Variants

Layout 1 – Dark Theme

- Background: Dark grey / black
- Text: White
- Accent: Blue

Layout 2 – Vibrant Theme

- Background: Gradient (Pink → Purple → Blue)
- Buttons: Colorful
- Attractive and creative design

Layout 3 – Minimal Theme

- Background: White / Light grey
- Simple UI elements
- Clean and minimal design

Save Layouts:

- Layout1.png
- Layout2.png
- Layout3.png

Procedure:

- Shared all three layout images with users
- Asked users to rate based on:
    - Visual appeal
    - Usability
    - Readability
    - Ease of navigation

User Feedback:

Layout 1 (Dark Theme):

- Professional and modern look
- Suitable for video editing environment
- Improve brightness and icon clarity

Layout 2 (Vibrant Theme):

- Attractive and colorful design
- Slightly distracting background
- Reduce color intensity

Layout 3 (Minimal Theme):

- Clean and easy to use
- Best for beginners
- Good spacing and readability

Final Recommendation

Preferred Layout: Layout 3 (Minimal Theme)
Why?

- Clean and modern design
- Easy navigation
- Better user experience
- High user satisfaction

Step 6: Iterate and Refine

1. Refine the Design:

- Improve layout based on feedback
- Adjust colors and spacing
- Simplify UI elements

2. Final Testing:

- Conduct testing with users
- Ensure usability and performance
